PROFILE

Computer Science student at Cairo University passionate about Backend Development and Data Engineering. Skilled in Python, Java, C++, SQL, database design, and web development. Experienced in academic projects involving software engineering, data analysis, and UI/UX. Seeking an internship to apply my programming and problem-solving skills while developing expertise in backend and data-driven applications.

EDUCATION

Cairo University, Faculty of Computer and Artificial Intelligence IS department 2023 – 2027

Studied programming, databases, software engineering, data analysis, and web development through academic coursework and projects.

Experience

Full Stack .NET Core Trainee – DEPI 7/2026 – Present

Developing full-stack web applications using C#, ASP.NET Core, SQL Server, HTML, CSS, and JavaScript.

Building RESTful APIs and working with databases and backend development.

Applying software development best practices through hands-on projects and practical training.

Summer Intern – Commercial International Bank (CIB) 8/2026 – 9/2026

Participated in a professional banking environment and gained exposure to business operations and workplace practices.

Developed professional communication, teamwork, and problem-solving skills through practical activities and training.

Gained insights into the banking sector and its digital transformation.

Flutter Trainee – Information Technology Institute (ITI) 7/2026 – 8/2026

Developed mobile application interfaces using Flutter and Dart through hands-on training and practical projects.

Built responsive and user-friendly mobile applications following modern UI/UX principles.

Gained practical experience in API integration, state management, navigation, and application development.

Data Analysis Trainee – National Telecommunication Institute (NTI) 7/2026 – 8/2026

Gained practical experience in data analysis, data preprocessing, visualization, and statistical analysis.

Worked with Python, Pandas, NumPy, Matplotlib, and Power BI to analyze datasets and extract meaningful insights.

Applied data analysis techniques through hands-on projects and real-world datasets.

Web Design Trainee – NTI 4/2026 – 6/2026

Completed 120 hours of intensive Web Design training, developing responsive web interfaces using HTML, CSS, and JavaScript.

PROJECTS

Front-End Graduation Project – NTI ([see project](#)) 5/2026 –6/2026

Built a responsive front-end web application using HTML, CSS, JavaScript, and Bootstrap as part of the NTI Front-End Development training program. Implemented interactive UI components and optimized the application for usability and responsiveness

Automated Machine Learning (AutoML) ([see project](#)) 4/2026 – 5/2026

Developed a web-based AutoML application that enables users to upload datasets and automatically perform data preprocessing, model training, and evaluation. Implemented data cleaning, feature encoding, scaling, and class balancing techniques using Python and Scikit-learn. Applied machine learning algorithms for classification, regression, and clustering tasks, and presented performance metrics through an interactive user interface.

MovieTracker Web Application ([see project](#)) 3/2026 – 5/2026

Developed a Laravel MVC web application for managing and displaying movie data. Implemented CRUD operations, database migrations, validation, third-party API integration, and automated testing using Laravel and MySQL

Global Flood Prediction system ([see project](#)) 4/2026 – 2026

Collected and processed flood data for Nile Basin countries (2008–2018), generated a CSV dataset for analysis, and created map visualizations to identify flood-affected areas.

Manufacturing system UI/UX Project([see project](#)) 10/2025 – 12/2025

Led a student team in designing the UI/UX of a manufacturing system, coordinating tasks and delivering user-friendly interfaces within the project timeline.

3AWATLY Job Search Website ([see project](#))

2/2025 – 5/2025

Developed a web-based job search platform that enables users to browse and apply for job opportunities. Implemented user and admin functionalities for managing job postings and user accounts using Django. Designed responsive web pages and integrated frontend components with backend database operations.

Car Insurance Database System([see project](#))

3/2025 – 5/2025

Designed relational database for managing customers, vehicles, policies, and claims. Implemented tables, relationships, and constraints using SQL. Performed CRUD operations and data queries for insurance management

SKILLS

Programming Languages

C++ | Python | Java | JavaScript | Dart | SQL

Database

MySQL | SQL Server | Database Design |
.ER Diagrams | Database Normalization |
CRUD Operations

UI/UX

Figma | User Flow Desig | Prototyping

Tools

Git | GitHub | VS Code | Jupyter Notebook | .Microsoft Office | Draw.io

Soft skills

Teamwork | Leadership | Communication | Problem Solving | Team Coordination
| Time Management | Adaptability | Attention to Detail

Frontend Development

HTML | CSS | JavaScript | DOM Manipulation
| Responsive Web Design

Backend Development

Django | PHP | REST APIs

Mobile Development

Flutter

GIS

ArcGIS | Spatial Analysis | Map Visualization

Voluntary

Flutter Student Activity Participant – SBS

2/2026 – 8/2026

Participated in Flutter student activities and gained practical experience in developing mobile application interfaces using Flutter and Dart.

Certificates

Flutter Development Training Certificate – ITI | 2026

Data Analysis Training Certificate – NTI | 2026

Web Design Training Certificate – NTI | 2026

SBS Flutter Student Activity Certificate | 2026
